EXPLANATORY NOTES

This bulletin contains revised series from July 1969 to June 1971 and replaces the series published in monthly bulletins "Employment and Unemployment" (Reference No. 6.4) for the same period. It is a continuation of the bulletin "Employed Wage and Salary Earners, June 1966 to June 1969" (Reference No. 6.23) issued on 24 April 1970. The series of estimates contained in these bulletins, except those relating to government employees and defence forces, are based on comprehensive data derived for the purpose from the population census of June 1966. The statistics for June 1966 are referred to herein as "benchmarks". For the period from July 1966 to date the figures are estimates designed to measure month-to-month changes in the sector of employment to which the benchmarks relate.

2. Between population censuses the employment data are obtained from three main sources, namely, (a) current pay-roll tax returns; (b) current returns from government bodies; and (c) some other current returns of employment (e.g. for hospitals); the balance, i.e. unrecorded private employment, is estimated. At June 1966 recorded employment obtained from the foregoing sources accounted for about 85 per cent of the total number of employees in the industries covered, as determined by the census.

3. The figures in this bulletin generally relate only to civilian wage and salary earners, not the total labour force. They therefore exclude employers, self-employed persons and unpaid helpers. Also excluded, because of the inadequacy of current data, are employees in agriculture and in private domestic service. Defence forces are included in Table 1.

4. Estimates for the period June 1966 to date are not comparable with those for earlier periods, because of (a) the adoption of a new definition of the labour force in the 1966 population census, from which the benchmarks for the current series were derived and (b) the inclusion of full blood Aborigines. The new definition resulted in the inclusion of a considerable number of part-time employees (mostly females) who had previously been excluded.

5. The concepts and definitions adopted at the 1966 census conformed closely to the recommendations of the Eighth International Conference of Labour Statisticians. At the census the following questions were asked in respect of all persons fifteen years of age and over:

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)?"

"Did the person do any work at all last week for payment or profit?"

Provided he had not been temporarily laid off by his employer without pay for the whole of the week, a person who answered "yes" to either of these questions was classified as employed. Persons in this category who were stated to be "working for wages or salary", except members of the defence forces, or persons employed in agriculture or private domestic service, have been included in the benchmarks for the current series.

6. The benchmark figures were derived from particulars recorded for individuals on population census schedules, while the estimated monthly changes are derived mainly from reports supplied by employers, relating to enterprises or establishments. Because the two sources differ in some cases in the reporting of industry, the industry dissection of the census totals has been adjusted to conform as closely as possible to an establishment reporting basis. For this reason, and because crews of overseas ships were excluded from the benchmark figures, the estimates for June 1966 differ from those published in census bulletins (e.g. No. 9.6) which show particulars of the occupational status and industry of the population, and in other publications which contain population census results. The industry classification used throughout the series is that of the population census of June 1966.

7. Current data supplied by reporting enterprises or establishments generally refer to persons on the pay-roll for the last pay-period in each month. Persons who are on paid leave or who work during part of the pay-period and are unemployed or on strike during the rest of the period are generally counted as employed. Those not shown on employers' pay-rolls because they are on leave without pay, on strike or stood down for the entire period, are excluded.

8. Pay-roll tax returns for the period covered by this bulletin were required to be lodged by all employers paying more than \$400 a week in wages (other than certain Commonwealth Government bodies, religious and benevolent institutions, public hospitals and other similar organisations specifically exempted under the Pay-roll Tax Assessment Act 1941-1969).

9. Particulars of employment obtained from other collections, such as the annual manufacturing census and censuses and sample surveys of retail establishments, are used to check and where desirable to revise the estimates. Some figures in this bulletin are subject to further revision as the results of later censuses and surveys become available.

10. Although the series measure reasonably well the short-term trends in employment in the defined field, they may be less reliable for longer-term measurement. There are conceptual differences between benchmark and pay-roll data, and changes in such factors as labour turnover, multiple jobholding and part-time working all affect the trend over longer periods.

NOTE. 1. Any discrepancies between totals and sums of components in tables are due to rounding.

2. The symbol .. means nil or less than 50 persons.
